

PROJECT SNAPSHOT

**Project Name:**  
Marion 8050 Major Shutdown Tub and Boom

**Client:**  
BMA

**Date:**  
April-July 2021

**Machine/Equipment:**  
Marion 8050 Walking Dragline

Our Team

**116 people**

Man Hours Worked

**33,832 hours**

FMS Group Project Value

**\$3.55 million**

Safety

**Nil recorded**

CQFMS was engaged to deliver skilled trade labour and tooling for remediation works on a Marion 8050 Dragline at a valued client's QLD coal mine.

**PROJECT CHALLENGES**

The CQFMS projects division were able to successfully complete this shutdown during unprecedented border closures and difficulties related to COVID-19.

Due to border closures and quarantine periods, it was a challenge to maintain a complete crew of skilled tradespeople. Due to emergent works, we also had to adjust rosters due to overlapping scheduled shutdowns.

## THE BEST APPROACH

CQFMS took a meticulously planned approach to ensure the successful delivery of this major maintenance project.

Additional recruitment and planning was required to maintain crew numbers throughout COVID-19 and due to emergent works.

Works included extensive repairs to the dragline tub and boom as part of a wider shutdown.

Our responsiveness meant that the downtime on this major piece of equipment was minimised, ensuring the ongoing productivity of the mine.

116 skilled trade personnel were engaged in this shutdown with the project overseen by an experienced Project Manager.

## THE BEST RESULT

- This successful shutdown was executed with just one RWC recorded
- Spade Cluster upgrades were completed
- All field leadership targets were achieved
- Supervisor alignment sessions meant that all key personnel were well prepared and equipped
- All original works were completed on time and emergent works were prioritized to ensure machine was back up and running as quickly as possible
- Detailed planning ensured crew numbers were maintained for duration of project

## Delivering the Best to keep your mine running.
