P&H 4100XPC Breakdown Response

Client:
Glencore

Date:
December 2020

Machine/Equipment:
P&H 4100XPC Face Shovel

Our Team

14 people

Man Hours Worked

**732
hours**

FMS Group Project Value

**\$100
thousand**

Safety

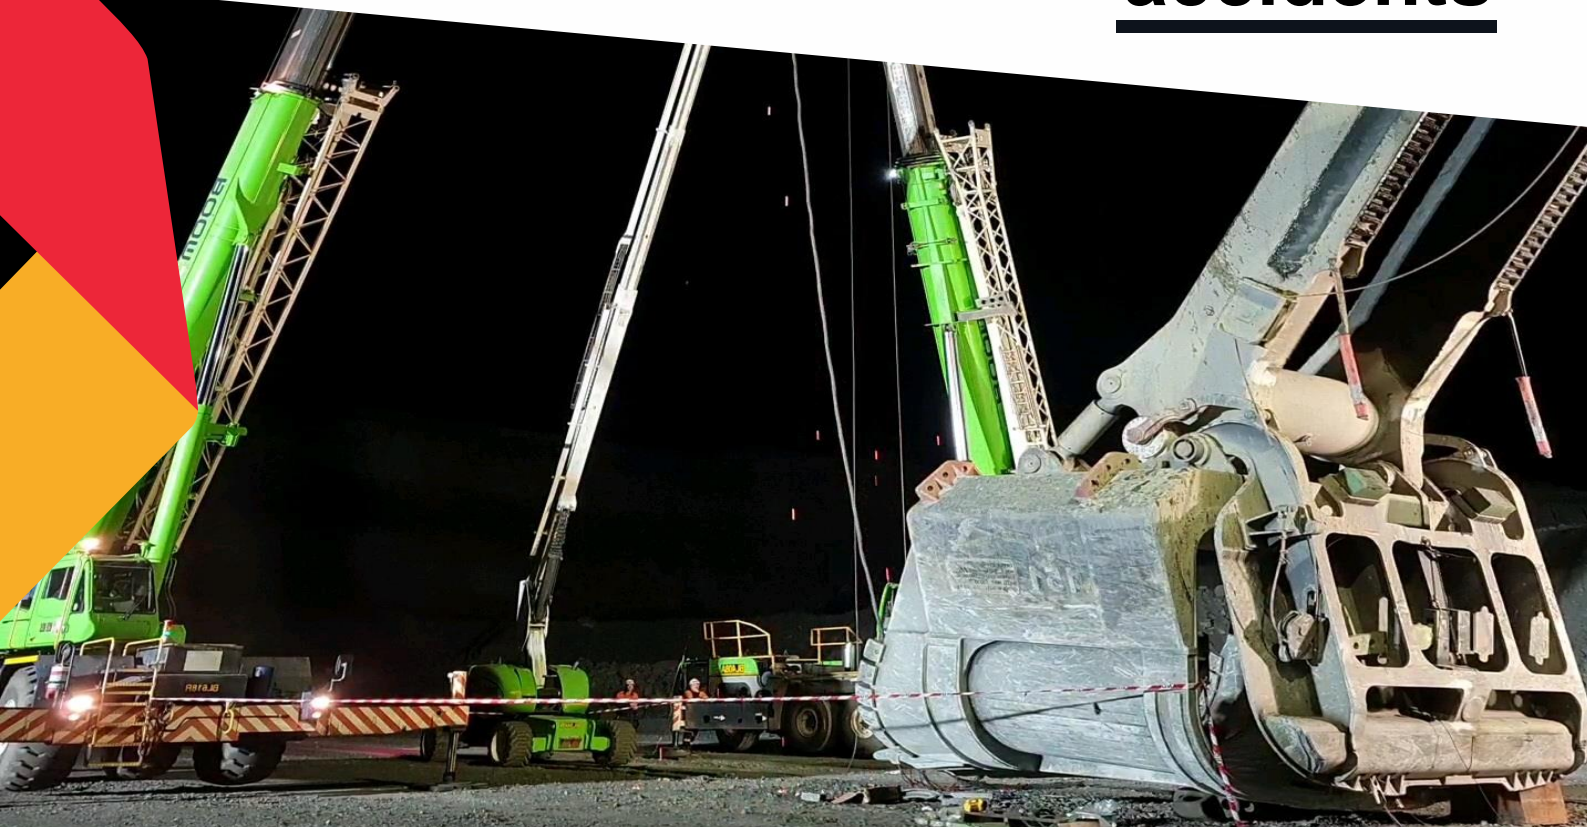

**zero
incidents/
accidents**

CQFMS was engaged to deliver skilled trade labour and tooling for works on a P&H 4100XPC Face Shovel breakdown at a valued client's site in Qld.

PROJECT CHALLENGES

The CQFMS projects division were able to successfully complete this unexpected shutdown on time and under budget, however there were several emergent works that required additional planning and resources.

Arranging our ideal crew of skilled tradespeople at short notice required dedication from our training, planning and recruitment teams and open communication with site and our team to ensure we selected the correct personnel for the works.

THE BEST APPROACH

CQFMS took a meticulously planned approach to ensure the successful delivery of this major breakdown project.

Works included the crowd pinion and boom point sheaves replacement, boom point crack repairs, handle torque tube crack repairs and carbody and rev frame crack repairs.

Our team of highly-skilled and experienced supervisors and tradespeople were key to the success of this job.

Our responsiveness meant that the downtime on this major piece of equipment was minimised, ensuring the ongoing productivity of the mine.

12 skilled trade personnel were engaged in this shutdown with the project overseen by an experienced Project Manager.

THE BEST RESULT

- This successful shutdown was executed incident free.
- All field leadership targets were achieved.
- Supervisor alignment sessions meant that all key personnel were well prepared and equipped.
- All original works were completed on time and on budget with emergent works completed by Christmas.
- Detailed planning ensured crew numbers were maintained for duration of project.

Delivering the Best to keep your mine running.
