

PROJECTS DIVISION

A specialist division providing project and shutdown maintenance solutions and assistance to sites across Australasia.

The FMS Group Projects Division consolidates the expertise of our field maintenance and diesel maintenance teams to deliver a full range of asset management services. The strength of our leadership teams and the quality of our experienced tradespeople ensures that each project is managed with efficiency and to the highest safety standards.

Our focus is on ensuring the best whole-of-life asset decisions are made to drive safety, efficiency and productivity, while minimising running costs. With design, construction, remediation and asset-maintenance services, our team will extend the life of your equipment and can provide turnkey project solutions making us a reliable principle contractor for major works.

OUR CAPABILITIES

We offer a mobilisation-ready workforce and in-house engineering and machining teams to provide specialist design, engineering, installation and maintenance services on structural, mechanical, electrical, fixed plant and mobile assets.

Our Projects Division provides end-to-end shutdown maintenance solutions combining the capabilities of multiple streams of specialist trades lead by experienced project managers from across the group, who work collaboratively to produce the best results.

OFFERING:

- Machine relocations and demobilisations
